Technical Data Sheet

INDOFIL MC 400

Acrylic emulsion polymer especially for flexible cementitious compositions

Indofil MC 400 is aqueous, anionic, plasticizer free acrylic- styrene copolymer dispersion.

PHYSICAL PARAMETERS:

Appearance	: Milky white viscous emulsion
Solid Content (150°C/20 min.)	: 57±1%
Viscosity (Brookfield LVF#2/60 @ 25°C)	: 100-1500 cps
pH (As Such)	: 7.5-9.0
Particle Size	: 0.2-0.3 micron
Specific Gravity (gm/cc)	: 1.07-1.08

PROPERTIES:

- Cementitious mortar modified with Indofil MC 400 exhibits excellent flexible coating along with improved physical & chemical resistance properties
- Good adhesion on old concrete & masonry surfaces
- Good resistance to ageing and stability to light

RECOMMENDED USES:

- Flexible hydraulic mortars for laying tiles.
- Flexible waterproof, two component adhesive mortars.

An ISO 9001 & 14001 Certified Company

Technical Data Sheet

APPLICATION METHOD:

Generally 20-30% modification of polymer solids based on cement weight should result in excellent water proofing & flexible coating. The other ingredients such as silica flour, chalk, ground quartz & defoamer to be added according to need and prior to application of coatings.

It is also mixed together with bitumen emulsions & for modifying hydraulic binders & granular aggregates. Especially systems for bridging over cracks and flexible coating for flat roof can be produced from it.

STORAGE:

Indofil MC 400 is non-flammable, non-combustible. It should be stored under shade. It should not be exposed to direct sunlight.

SHELF LIFE:

6 months from the date of manufacturing

Disclaimer:

The suggestion and data in this bulletin are based on information we believe to be reliable. It is offered in good faith, but WITHOUT GUARANTEE, as the conditions and methods of the use of our products are beyond our control. We ALWAYS recommend that the prospective user should determine the suitability of our products and suggestions on an experimental basis first, Before ADAPTING on a commercial scale.
